

# Spanish for Children & teenagers

### *Why is the Spanish for Children Program more expensive than our regular Program for adults?*

While we take great pains to customize all of our classes to the unique needs of every student, we find that children's classes tend to require significantly more teacher prep time and specialization. This normally involves more supplemental teaching materials, individualized courses of study, and requires special training and aptitude among our teachers. Unfortunately, this translates into slightly higher costs in order to maintain our high teaching quality.
